CAREER OBJECTIVE

Agricultural Engineering undergraduate with hands-on experience in Hydroponics (NFT), Precision Agriculture, and Farm Machinery, seeking an internship or Graduate Engineer Trainee opportunity to apply CAD design, controlled-environment agriculture, and data-driven crop management to deliver scalable Agri-Tech solutions.

EDUCATION

B.E (Agricultural Engineering)—Alva's institute of engineering and technology 2022 – 2026

Relevant Coursework: Farm Machinery, Soil & Water Engineering, Precision Agriculture, Post-Harvest Technology

PUC (PCMB) —BEST PU College 83.25% 2020 – 2022

TECHNICAL SKILLS

Domain: Hydroponics (NFT) | Precision Agriculture | Controlled Environment Agriculture | EC & pH Monitoring | Nutrient Management | Farm Machinery | Smart Irrigation

Software: Solid Edge (CAD) | MS Office | Technical Documentation | Data Collection & Analysis

Professional: Leadership | Project Management | Problem-Solving | Team Collaboration | Field Operations

PROJECTS

NFT Hydroponics System — Setup, Operation & Consultancy

- Designed and commissioned a Nutrient Film Technique (NFT) hydroponics unit, managing EC, pH, and nutrient dosing to sustain healthy crop cycles.
- Delivered consultancy to clients on system layout, plumbing, and CEA practices, reducing setup errors and accelerating first-harvest timelines.

Mobile Field-Operated Horse Gram Thresher — Engineering Design Project

- Conceptualized a low-cost, field-mobile thresher to mechanize horse gram processing for small and marginal farmers, targeting 40–60% reduction in manual labour.
- Engineered the threshing drum, frame, and power transmission in Solid Edge; optimized component geometry for improved grain separation and throughput.

INTERNSHIPS & TRAINING

- CFMTTI, Budni — Farm Machinery Training (21 Days):** Trained on tractor systems, hydraulics, PTO, and Kirloskar engine assemblies; performed performance testing of agricultural implements.
- KVK, Brahmapura — Field Training (13 Days):** Executed crop husbandry, soil sampling, and integrated farming demonstrations alongside scientists.
- IIHR — Digital Horticulture & Precision Farming Program:** Completed structured training in IoT-based smart irrigation, sensor analytics, and protected cultivation.
- Hydroponics Consultancy:** Advised growers on NFT setup, nutrient schedules, and EC/pH calibration to maximize yield consistency.
- TiEcon Mangaluru 2026:** Represented Agricultural Engineering at a regional startup conclave; networked with Agri-Tech founders and investors.

ONLINE PRESENCE

- <https://sites.google.com/view/sathish-agritech>

CERTIFICATIONS

- Digital Horticulture & Precision Farming — ICAR-IIHR
- Farm Machinery & Equipment Training — CFMTTI, Budni (Govt. of India)
- Krishi Vigyan Kendra Field Training — KVK Brahmapura
- Hydroponics & Controlled Environment Agriculture — Certification

LEADERSHIP & ACHIEVEMENTS

- Founder & Team Lead — Team GreenSynth:** Built and led a 6-member Agri-Tech team developing sustainable hydroponics solutions; secured NewGen IEDC support.
- VTU SRISHTI Ideathon — Finalist** for Agri-Tech innovation pitch; awarded **Certificate of Appreciation**.
- Presenter — LAKE 2024 Symposium;** **Participant — Cashew Mela;** **Volunteer — International Conference on Agricultural Sciences.**

RESEARCH INTERESTS & LANGUAGES
